Art Unit: 2651

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 13-18, drawn to a pulsed laser, classified in class 372, subclass 6.
- II. Claims 7-12, drawn to an optical device having a pulsed laser, classified in class 369, subclass 122.

The inventions are distinct, each from the other because:

Inventions group two and group one are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the particular structural elements such as a band gap. The subcombination has separate utility such as laser printers.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Richard Jaworski on Dec. 07, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.
